DETAILED ACTION

Response to Amendment

The amendment filed on 12/04/2008 has been entered. Claims 1-5 and 7-10 remain pending in the application.

Abstract

The abstract of the disclosure is objected to because said abstract is not a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Schreyer (US 3,085,083).

Regarding claims 7 and 9-10, Schreyer discloses a fluoro-polymerized material in Example V and Table IV comprising a copolymer of tetrafluoroethylene and hexafluoropropylene containing 15% by mass of hexafluoropropylene, said fluoropolymer is one of which polymer terminal groups are -CF₂H and the number of unstable terminal groups meets the claimed range, and said fluoropolymerized material does not substantially contain a metal residue containing an alkali metal element and/or alkaline earth metal content (Since Schreyer

Art Unit: 1796

teaches that the copolymer is washed repeatedly to remove any inorganic materials in the polymer, there would be no metal residue which would meet the claimed range, objective to evidence of the contrary).

Regarding the method limitations recited in claim(s) 8, the examiner notes that even though a product-by-process is defined by the process steps by which the product is made, determination of patentability is based on the product itself. *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). As the court stated *in Thorpe*, 777 F.2d at 697, 227 USPQ at 966 (The patentability of a product does not depend on its method of production. *In re Pilkington*, 411 F. 2d 1345, 1348, 162 USPQ 145, 147 (CCPA 1969). If the product in a product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process). See MPEP § 2113.

Response to Arguments

Applicant's arguments filed 12/04/2008, with respect to claims 1-5 have been fully considered and are persuasive. The rejection of claims 1-5 has been withdrawn.

Applicant's arguments filed 12/04/2008 with respect to the rejection(s) of claim(s) 7-10 under 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art. The following comments apply:

A) The previous double patenting rejection of claims 1-5 to U.S. Patent No. 6,451,962 has been withdrawn, since said patent does not recite the amount of alkali or alkaline earth metal.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record, Hiraga et al. (US 6,451,962) teaches a method of producing a fluoropolymer by which a melt-processable fluoropolymer having unstable terminal groups by melt-kneading. However, Hiraga et al. does not teach or suggest the specific terminal group or groups of instant claim 1. Therefore claim 1 is deemed nonobvious over the prior art of record.

Conclusion

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 09/04/2008 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
